| Capacity & Dimensions | | |
|-----------------------|-----------------------|---------|
| 24-hour Capacity | up to 825 lb (375 kg) | |
| Width | 52" | 1320 mm |
| Height | 36.5" | 927 mm |
| Depth | 33.5" | 851 mm |
| Weight | 750 lbs | 340 kg |

| Utility Usage | | |
|--------------------|--|--|
| Water Consumption | about 30-60 gallons (115-230 l.) / day | |
| Power Consumption | about 75-150 kilowatt hours / month | |
| Effluent Discharge | about 60-110 gal (230-380 l.) / day | |

Utility Connections

Incoming Water, Power, Data

Effluent (to sewer line) - 2" OD, 1.5" NPT ID

Ultility Requirments (by customer): Inlet Water - 90-110 degree F, 50-80 psi / Discharge - gravity fow or pump (optional) / Ethernet cable for Date Acess (our Blue Cloud) / Power - 115 VC, 50 Hz or 110 VAC, 60 Hz

BizHiTech

vpress[®]

- Low profile, countertop work surface for optimal use of space
- Designed for medium to large volume food waste generators
- Can process up to 100 lbs (450 kg) of food waste per day

Comes equipped with our BioHiTech cloud-based technology to reduce food waste generation

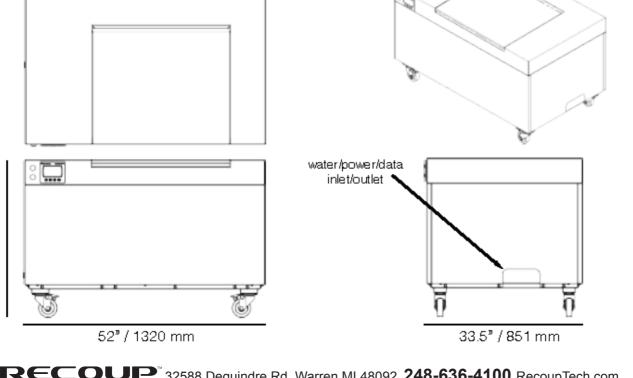

Reduce Food Waste with Data Analytics

Accurate real-time information eliminates the uncertainty about where food waste occurs, how much is being wasted and its associated value. Our Blue Cloud waste tracking technologies forecasts accurate supply chain and inventory needs, standardizes best practices for

production, improves future planning for the prevention of waste, and tracks your carbon footprint and credits.

36.5" / 927 mm
